## **Theme of the Programme**

Writing research article is one of the necessary parts of academic activities in higher education. Research output and its implication should be communicated through scientific and scholarly manner. But, at the same time it should be understandable by target audience of the concerned subject. In this view, academicians and research scholars are failed to make a presentation as research article which need certain parameters and preconditions. Writing research article/proposal depends on the content of the research as well as the style sheet of the publishers. Therefore, this programme will provide an eye opener for potential researchers. Mere writing a research article / proposal will not fulfil the academic rules and regulations and academic research involvement. There is a need of publishing research article and it should be digitalized in various database which helps to promote the citation. In this regards, this programme helps to update the participant skills in online database for the purpose of promoting citation.

## **Target Participants**

The workshop is open to faculty Members/ Research Scholars from Social Science, and Business Studies. The workshop will be open to 50 participants only. The criteria for selection of participants will be based on the first come first serve. Maximum two participants from one institution will be permitted. The selected participants will be informed through e-mail. The participants will be provided with course materials, kit, working lunch and certificate on successful completion of the programme.

## **Registration**
