INFED

INFLIBNET Access Management Federation (INFED), the **first and only Federation in India**, that has adopted Shibboleth (a SAML based) open source software, for authenticating authorized users from colleges and universities and provide them seamless access to e-resources from anywhere, anytime.

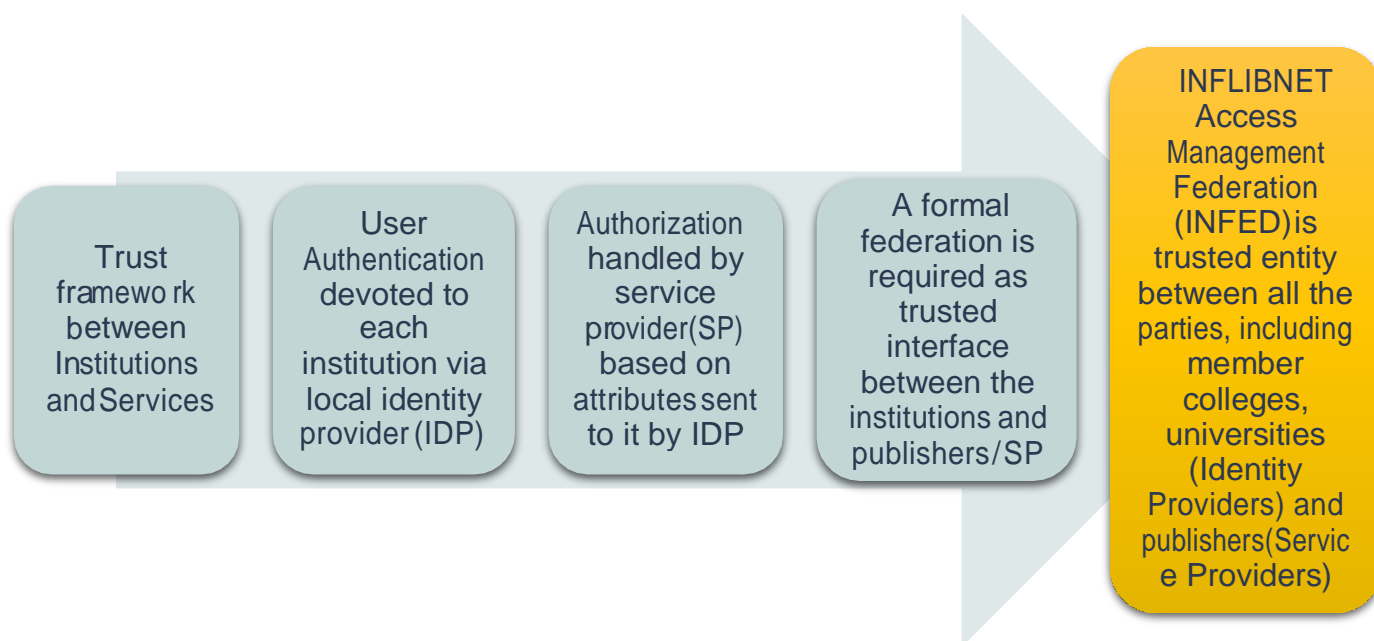

Impacts of INFED :

- ❖ Access to e-resources **anytime, any where, any device**.
- ❖ Member institutions will get **off-campus access** of their subscribed resources if the respective service provider is a part of INFED
- ❖ Institute can provide protected content to **multiple organizations** using a single authentication framework.
- ❖ The **home institution can control when an identity is disclosed**, and how much information is revealed.
- ❖ Web-based distributed authentication and authorization services can be used for any other purpose beyond e-resources (EduRoam).
- ❖ Many institutions are spending huge money to avail off-campus facility from private companies. By joining with INFED, members will avail this facility almost free of cost.
