National Seminar on Integrated Waste Management and Energy Recovery

The National Seminar on “Integrated Waste Management and Energy Recovery” was held on 12th February, 2015. A total of 200 participants had witnessed the event and had actively participated in all the segments of the seminar. Several veteran resource persons had addressed the gathering and had shared their valuable inputs in different aspects of the topics related to the seminar. Various technical sessions including oral and poster presentations had been organised. Around 100 abstracts were received and were put into appropriate sessions according to the themes. The presentations were evaluated by the experts and the best papers were rewarded. The participants were provided with the seminar kits including abstract book and notepads. A copy of the abstract book, photographs and program schedule have been enclosed.
