

Bio-Fermentation Facility

BioFlo 115 (New Brunswick)

Biofermentation facility is equipped with BioFlo 115 bioreactor. BioFlo/CelliGen 115 is a Benchtop fermentor that provides a fully equipped system for fermentation. It can be employed for batch, fed batch or continuous culture with process control for pH, dissolved oxygen (DO), agitation, temperature, pump feed, antifoam and foam/level. Water-jacketed and heat-blanketed autoclavable glass vessel (total volume of 7.5 litres). Biofermentation facility has separate autoclave, chiller and compressor for operation of fermenter.
