28th May, 2015

To whomsoever it may concern

I hereby confirm that Mr. Rahuraam AM, worked for 6 months in my laboratory as an intern, from 4th Dec 2014 to 31st May 2015.

The title of his project was "The role of N-WASP in angiogenesis and keratinocyte proliferation". Mr. Rahuraam worked very hard to establish the culture of HUVEC cells and co-culture of fibroblast with HUVEC cells to study angiogenesis. He also did some molecular cloning to generate recombinant plasmids. Thus Rahuraam AM is familiar with Molecular and Cell Biology techniques (PCR, DNA cloning and Tissue Culture).

Please contact me, should you need to any clarification on the matter.

Yours sincerely,

A/Prof. Thirumaran Thanabalu
