15th February 2018

UNU-IAS-Shimadzu Project on Monitoring and Management of POPs in Asia
Analysis session on Analytical Method for Perfluorochemicals (PFCs),
6th – 9th March 2018, Singapore

Dear Mr. Arun Elaiyaraja,

It is my pleasure to invite you to the forthcoming Analysis Session for Perfluorochemicals (PFCs) which is a part of Phase VII of the above-captioned UNU-IAS-Shimadzu project. The training course will be held from 6th – 9th March 2018 at UNU Laboratory of Application Development and Support Centre, Shimadzu Asia Pacific Pte. Ltd in Singapore.

The Analysis Session aims to enhance the participating countries' monitoring capacity of PFCs (especially PFOS and PFOA). Participants will review analytical method for determination of PFOS and PFOA in surface water, sediment and biota utilizing modern analytical equipment, namely Liquid Chromatography Mass Spectrometry (LCMS). More details regarding your participation in the Analysis Session will be sent to you in due course.

UNU-IAS will arrange your travel and cover your expenses including a most direct economical airfare to Singapore and return, local transportation, accommodation, registration and per diem.

If you have any questions or comments about the forthcoming Analysis Session, please do not hesitate to contact Ms. Eiko Takashita (takashita@unu.edu).

Sincerely yours,

Naoya Tsukamoto
Project Director,
United Nations University Institute for the Advanced Study of Sustainability
